Summer 2012

The world always looks brighter from behind a smile
- Arthur Unknown -

Do you suffer from chronic illness?

medicare Is offering you a helping hand!

Are you aware that eligible patients are able to receive up to \$4250 in Medicare benefits for dental services over two consecutive calendar years? To find out if you are an eligible candidate, a patient must meet certain criteria. We have listed below the following steps that you must take place before your dentist can start treatment.

1. Make an appointment to see your GP so they can go over your medical / history conditions. If eligible, your GP will fill out the "EPC" forms and lodge them with Medicare direct.
2. Notify our surgery that you have seen your GP and there is an "EPC" plan in place. We will arrange an appointment with the referred dentist and request you to drop off the paperwork given to you by your doctor.

3. Our reception staff ring Medicare and check that all relevant documents have been submitted for your dental appointment.
4. After your dental appointment, present your Medicare card as your account will be BULK BILLED for your convenience.

Congratulations to Dr Ryan Ip & Alice on the safe arrival of the first child, Evan Ip.

mind the gap!

Fashion trend alert or accepting imperfection.?

Gap-toothed women are in vogue.

Models with a gap (diastema) are all over the fashion runways and in magazines.

There has lately been something quite mysterious about a diastema between women's front teeth.

In Ghana, Namibia & Nigeria, a gap between women's teeth are seen as a sign of beauty and fertility! Some women even go to the extent of creating an artificial gap in their teeth.

Beauty is and always will be in the eye of the beholder!

CONFIRMATION & CANCELLATION POLICY

We at MSDG are implementing a new 48 hour confirmation & cancellation policy. This is to help our patients who need an emergency appointment.

We thank you for your patience and assistance through this transition

Floss the teeth you want to keep!

Flossing helps remove food particles and plaque in your mouth below the gum line and between your teeth where your toothbrush can't reach. It is very important to floss between your teeth every day. Don't be too concerned if your gums may bleed a little. If the bleeding does not go away after the first few times, let your dentist know at your next appointment.

Why not try to book your appointment for a check-up and clean six months in advance to get a time that suits you!

We call you 1 week prior as a reminder and 48 hours to confirm.

This way you won't be left speechless if we can accommodate you straight away!

invisalign

Invisalign is the invisible way to straighten teeth using a series of custom-made, nearly undetectable aligners.

Whether your teeth are crowded, too far apart or have shifted since previously wearing braces, you'll have a new reason to smile.

At your Initial examination we will determine if **Invisalign** is right for you! We will then take impressions of your teeth and photos which are submitted to **Invisalign**.

Using the latest advances in 3-D computer technology, **Invisalign** carefully translates our instructions into a series of precisely custom-made aligners.

You can remove your **Invisalign** aligners to continue to enjoy a full range of your favourite foods and most importantly for brushing and flossing.

Only dentists who have been trained and certified can treat patients using **Invisalign** technology.

Call now for an appointment!
